CEDAR FENCING

QUALITY MATERIALS

MOD PANEL

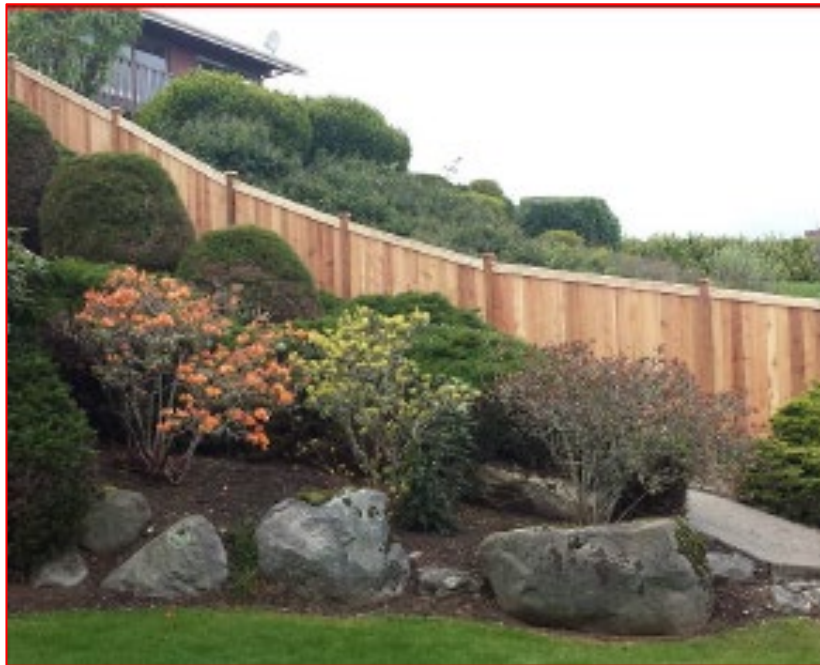

Style features a picture-frame style construction, often referred to as a “Good Neighbor” fence because both sides present a clean, finished appearance. This sleek and sturdy design offers balanced aesthetics, structural strength, and a polished look from every angle — making it ideal for shared property lines and open-view settings.

ESTATE

A classic and affordable design, the Estate style features exposed posts with boards running between them and a decorative cap on each post. Available with two or three rails, it offers a sturdy, dependable structure with timeless appeal.

RAMBLER

Our most economical cedar fence option, the Rambler provides solid privacy and security with a simple, functional design. Posts are not exposed, and boards run across the front for a clean, uniform appearance. It offers dependable strength at an exceptional value.

EXPERT INSTALLATION

LEXINGTON

The Lexington is a hybrid design that blends elements of Mod Panel, privacy, and picket fencing. Built with variable picket heights and framed along the top, it delivers the “Good Neighbor” appearance of a full panel fence while maintaining the lighter, transitional feel of picket styling.

PICKET

A timeless and traditional design, the Picket fence offers classic curb appeal. It can be customized by adjusting picket width, spacing between pickets, and overall picket style. Available options include flat, scalloped, and reverse scalloped designs to suit your preferred look.

HORIZONTAL

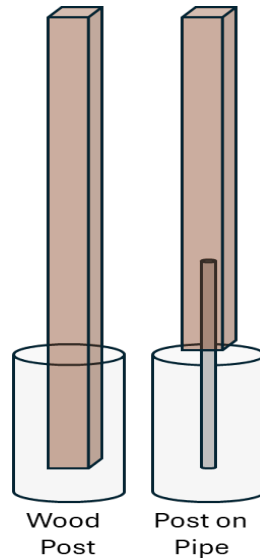

One of today’s most modern fence designs, the Horizontal style offers clean lines and contemporary appeal. The look can be customized by varying board widths and spacing between boards to create a bold, architectural statement.

ACCESSORIES & OPTIONS

POST-ON-PIPE OPTION – WET AREA

For over 40 years, the Post on Pipe system has proven its reliability in wet and challenging ground conditions. This method reinforces wood fences with a steel post concealed inside the wood post — adding strength and longevity without the mounting limitations of surface brackets. You get the structural integrity of steel with the beauty and clean appearance of an all-wood fence.

CAPS & HARDWARE

Additional cap and hardware options available.

PICKET WOOD GRADES

WARRANTY

Five year on metal materials and workmanship – identified in contract.
