

DISCOUNT FENCE

CHAIN LINK FENCING

QUALITY MATERIALS

RESIDENTIAL

Residential fencing is our most economical type of fencing. The standard type is galvanized chain link using 11 gauge wire with tubing posts, top rail and bottom tension wire. Additional options are available such as slats for privacy and vinyl coating suitable for young children and animals. Some customers prefer light commercial in a residential setting for longer life fencing.

LIGHT COMMERCIAL

Light commercial fencing is our medium duty fencing. The standard type is galvanized chain link using 9 gauge wire with structural strength posts, top rail, and bottom tension wire. Additional options available include slats, barb wire, or vinyl coating. With heavier steel posts and top rail along with a thicker wire, this style offers best value for money.

HEAVY COMMERCIAL

Heavy commercial fencing is very stout, most often used for industrial, security and public works projects. Standards are set by the industry with modifications determined by owner. Most heavy commercial fencing is built using thicker pipe and rail, with thicker gauge wire, top rail and bottom tension wire. Additional options are available such as thicker steel posts, bottom rail, slats, or barb wire.

EXPERT INSTALLATION

PIPE STRENGTH

Pipe strength varies from residential tubing (thinner steel) to schedule 80 (thicker steel). Minimum pipe strength determined by fence type.

WIRE SIZE & TYPE

Wire size is the thickness of wire. Wire type is either standard 2" diamond shape with options for larger or smaller diamonds.

PIPE & WIRE COATING

PVC or vinyl coated chain link comes in a variety of color and thickness options.

SLATS

Slats are available in private, semi-private or bottom lock, in a variety of colors, and with or without graphics.

BOTTOM RAIL

Chain link fencing has top rail and tension wire (standard) with the option to exchange top rail for tension wire and bottom tension wire for rail.

BARBED & RAZOR WIRE

For added security, customers with fences 6' tall and taller may add barbed wire and/or razor wire.

STEEL FITTINGS

We only carry steel and pressed steel fittings. We do not use cast aluminum fittings.
